Product Description
The ALSG274CS is a pyrotechnic rubber ball that is designed to deliver a high volume of CS Smoke upon initiation and is very effective for the dispersal and control of crowds. The CS Handball utilizes a Model M201A1 fuze and discharges chemical agent for approximately 10-20 seconds. The Rubber ball form factor is ideal for corrections/riot applications, as it reduces the potential for “throwback.” It is recommended that the operator attend an ALS Less-Lethal Training Class prior to use of these rounds.
