

What Patriots Across the State Are Asking Senator Argall Commit to in Word, Writing, and Action:

- He's setting us up for, and he's explicitly in support of, a forensic audit of the November 2020 election, which includes, at a minimum, the following:
 - At a minimum a Maricopa 'Arizona' style audit, that will include improvements based on recommendations from the PA delegation that witnessed it
 - And a willingness to hear additional requirements from Patriots at a later date
 - And that you will ensure there will be citizen oversight to ensure transparency
 - It includes both Presidential and tickets down ballot as well
 - It's clear as to what ballots are in and out of scope for a forensic audit
 - It includes ballots from satellite offices and county drop-box locations
 - It includes all accepted and rejected mail-in and absentee ballots
 - It includes all accepted and rejected provisional ballots
 - It begins with Counties most likely to have large amounts of fraud: Allegheny and Philadelphia Counties
 - And then if further auditing was warranted (based on AQL style results), it would include, at a minimum: Montgomery, Buck, Chester and Delaware Counties
- He's willing to articulate a path (process) to success, that includes, at a minimum:
 - The intended and planned process
 - An alternative path (i.e. plan B) path to success
 - A timeline (the clock is running out on the ballots)
 - Who will do it
 - How it will be funded
- He's willing to put it in writing
